

## Feather Meal (Hydrolyzed)

Hydrolyzed feather meal is ineligible for export if it is produced in a state that Taiwan considers to be affected by low pathogenicity notifiable avian influenza (LPNAI). For information on which states Taiwan considers affected by LPNAI return to the previous screen, and select “Important information regarding trade bans on various products.”

Hydrolyzed feather meal from other states may be imported to Taiwan with a VS Form 16-4 with the following exact certification statements added to the additional declaration area. No additional statements may be included.

This is to further certify that highly pathogenic notifiable avian influenza (HPNAI) and exotic Newcastle disease (END) do not exist in the United States of America.

This office has on file a notarized affidavit from [insert name of company here] verifying the accuracy of the statements below.

The certified hydrolyzed feather meal was produced at the following manufacturer: *[Insert manufacturing plant name and address (may not be in Pennsylvania)]*. The certified material was produced: *[insert date or dates of production\*\*\*]*.

The certified material was derived from animals of the following species: Avian.

The animal protein ingredients (except dairy) were not derived from cattle, sheep, goat, or other animals susceptible to bovine spongiform encephalopathy from areas officially declared by the Council of Agriculture, Executive Yuan, as bovine spongiform encephalopathy infected areas. There has been no commingling of any ingredients with any ruminant origin items (except dairy) from any BSE country at any time.
